Professional Summary

Senior Product Designer with 6+ years of experience across fintech, B2B SaaS, enterprise software, web and mobile products. I lead work from product discovery and user research through prototyping, high-fidelity UI, design systems, documentation, handoff and implementation review.

My front-end background helps me collaborate closely with Product and Engineering, turning complex workflows, customer needs and business goals into clear, scalable experiences.

Core Skills

Product Design: End-to-end ownership, product thinking, product discovery, UX/UI Design, user flows, prototyping, high-fidelity UI and responsive design.

Research and Data: User research, interviews, usability testing, focus groups, customer feedback, product metrics, funnel analysis and experimentation.

Systems and Delivery: Design systems, component libraries, accessibility, documentation and handoff, Design QA and Product-Engineering collaboration.

Tools and Technology: Figma, FigJam, ProtoPie, Storybook, Hotjar, Matomo, Tableau, Lighthouse, HTML, CSS, JavaScript, React, Python and AI tools.

Professional Experience

Somapay

Nov 2024 – 2026

Senior Product Designer

Brazil

- Led end-to-end Product Design across mobile banking and HRTech products, covering discovery, user research, user flows, prototyping, high-fidelity UI, validation, documentation and handoff.
- Designed Crédito do Trabalhador from early exploration through launch, translating eligibility rules, financial regulations and business requirements into a clear mobile lending experience.
- Conducted focus groups and usability testing around eligibility, interest rates, total cost of credit, transparency, contractual conditions and trust.
- Redesigned credit, onboarding, Pix, payments, account and support workflows while balancing conversion, customer needs, compliance and technical feasibility.
- Contributed to a 28% increase in the app's Google Play rating and supported its growth from approximately 200,000 to more than 750,000 users.
- Created and evolved a scalable design system with component libraries, semantic tokens, accessibility standards, documentation and support for light and dark themes.
- Built a Python review-scraping workflow and used LLM-assisted analysis to classify thousands of customer reviews and support data-informed prioritisation.
- Partnered with Product, Engineering, Infrastructure, Data, Marketing, Compliance, Support and Commercial teams to manage trade-offs and improve implementation quality.

Instituto Atlântico

Nov 2021 – Jul 2024

UX Designer

Brazil / United States

- Designed complex B2B, enterprise and data-rich web products for Dell and other international technology clients.
- Turned operational workflows, business rules and technical constraints into responsive interfaces, user flows,

dashboards, tables and reusable interaction patterns.

- Conducted user interviews, usability testing, card sorting, workshops, benchmarking and quantitative analysis using Matomo and Tableau.
- Performed accessibility assessments in code and usability, evaluating semantic HTML, contrast, keyboard navigation, focus order, labels and error states with Lighthouse and Chrome DevTools.
- Documented findings for designers and engineers and supported delivery through handoff, implementation review and Design QA.
- Contributed to design systems, component libraries, accessibility standards and visual consistency across multiple product areas.

Garimpo UX

UX Designer

Jan 2020 – Nov 2021

Brazil

- Designed web and mobile products for retail and travel clients, combining user research, UX/UI Design, product strategy and prototyping.
- Conducted interviews, usability testing, benchmarking, co-creation sessions and customer-feedback analysis.
- Created journeys, service maps, user flows, wireframes, interactive prototypes, responsive interfaces, dashboards and reusable components.

Oowlish

Front-end Designer

Jun 2019 – Dec 2019

Brazil / United States

- Designed and implemented responsive interfaces for Petco using React, Styled-Components and Storybook.
- Built and documented reusable design-system components while collaborating with US-based designers and engineers.

Additional Education

Coursework in Systems Analysis and Development

Programming logic, software architecture, data structures and front-end development.

Coursework in Audiovisual and New Media

Visual communication, storytelling, animation, interaction design and motion design.

Languages

Portuguese: Native

English: Fluent / C2

Additional Expertise

B2B SaaS, enterprise products, consumer products, AI-powered products, operational workflows, data-rich experiences, interaction design, journey mapping, wireframes, responsive design, stakeholder management, cross-functional collaboration, business outcomes, product data, iteration, implementation quality, front-end knowledge and remote work.
